Death due to STDs by gender in the US, 1996 - 2014

Death rate in the US due to Sexually Transmitted Diseases (STD) by gender, 1996 - 2014

Women had more than twice the death rate in the US due to Chlamydia between 1996 and 2014 (505 deaths per 100,000 population), while men had a death rate of 170 deaths. The situation for Gonorrhea was more or less the same for both groups at around 115 deaths per 100,00. Death rate for Syphilis was higher for men at 6 deaths compared to women at 1.4 deaths per 100,000.

Input Data

Disease	Gender	RatePer100k
Chlamydia	Female	504.84
Gonorrhea	Female	116.00
Syphilis	Female	1.43
Chlamydia	Male	170.14
Gonorrhea	Male	113.51
Syphilis	Male	5.98
